

GEN 2.7 SUNRISE/SUNSET TABLES

2.7.1 The tables in the following pages provide **sunrise/sunset data** for all category A and main category B aerodromes (see AIP GREECE – **AD 1.4** section). Sunrise/sunset hours between the referred dates shall be calculated with linear interpolation.

2.7.1.1 Check published operation hours of no-24H aerodromes. **Military aerodromes** of category A (**marked as: A*** in the tables below) require prior permission for GA and private flights. Furthermore, category B aerodromes are not available for public use – only under prior permission by the aerodrome administrator. (See **AD 1.4.1.1.1** and **AD 1.4.1.1.2** respectively).

2.7.2 For aerodromes, airfields, water aerodromes and heliports that are not mentioned in this section, the hours of the nearest aerodrome shall be used.

2.7.3 **The times** for sunrise (**SR**) and sunset (**SS**) in the tables are given in **UTC** (see also **GEN 2.1.2**). Beginning of morning twilight and end of evening twilight shall be calculated by subtracting or adding 30min respectively.

2.7.3.1 Local time is calculated by adding +2h during winter period and +3h during summer period, e.g. Winter local time = UTC hour + 2HR, Summer local time = UTC hour + 3HR .

2.7.4 The **Sunrise/Sunset Tables** listed below are given for the period **2013 - 2023**.
